

- Abbe condenser, 3, 4f, 5t
- Acanthamoeba* spp., 291, 292f
- acid-fast stain, 35–37, 37f, 254, 255–256, *colorplate 9*
- acidic dyes, 21
- acidophilic cultures, bacterial stains, 21–22, 22f
- acquired immunodeficiency syndrome (AIDS), 253
- acridinium, 130
- acute enterocolitis, 192
- acute serum sample, 300
- acute urethral syndrome, 213
- adenovirus, cell culture, 266f
- aerobic bacteria, 153, 234, 235
- agar dilution method, 85
- agar media. *See* plate cultures; slant cultures
- agglutination assays, 300
- AIDS (acquired immunodeficiency syndrome), 253
- Airborne Precautions, 307, 308t
- albumin, 58–59
- alcohol scrub, 74, 76
- alkaline phosphatase, 130
- alpha-hemolytic enterococci, 163
- alpha-hemolytic *Streptococcus*, 154, 156t, 157, 160, 162
- amebae, 289, 290f, 291, *colorplate 55*
- ammonia, 111
- amplicons, 131
- amplification assays
 - C. difficile*, 248
 - multiplex syndrome panel testing using, 133–136, 134f
 - overview, 131–133, 132f
 - for throat cultures, 155
- anaerobic bacteria, 242–250
 - antimicrobial resistance, 245
 - blood cultures and, 235
 - culture media for, 153, 242–244, 242t, 243f, 244f, 248–250
 - defined, 242
 - identification, 242t, 248–250
 - infections by, 244–248, 245t, 246t, 250
 - in intestinal tract, 189
 - morphology, 245, 246, 246t, 247f
 - in respiratory tract, 153
- anaerobic jar cultures, 243–244, 243f
- anamnestic response, 299–300
- aniline dyes, bacterial stains, 21–22
- anoxic conditions, 244

- antibiotics. *See also specific antibiotics*
 - defined, 56
 - diarrhea and, 245, 247–248, 250
 - peptidoglycans and, 29, 30f
 - prophylaxis with, 234
 - resistance to. *See* resistance to antimicrobial agents
 - susceptibility testing. *See* susceptibility testing
- antibodies
 - agglutination test and, 196–197
 - classes of, 299–300, 299f
 - defined, 120
 - serological testing. *See* serological testing
 - titer of, 300, 301
- antibody-coated latex reagents, 160
- antigen detection
 - assays for, 119–125
 - enterococci, 163
 - tuberculosis, 255
 - viruses, 268
- antigen detection immunoassays, 119–125, 155
- antigenic determinants, 120
- antimicrobial agents
 - chemical. *See* antibiotics; disinfectants
 - diarrhea associated with, 247–248, 250
 - molds and, 275
 - physical, 55–56, 57–59, 63–67. *See also* heat
 - resistance to. *See* resistance to antimicrobial agents
 - susceptibility testing for, 81–87. *See also* susceptibility testing
- antisepsis, 56, 72
- antiserum, 196–197
- apicomplexans, 289, 290f, *colorplate 57*
- API System, 200, 201, *colorplate 36*
- arboviruses, 264, 267
- arthropod bites, 226, 264, 291, 292
- ascending route of pyelonephritis, 211
- aseptic techniques and protocols
 - blood collection, 234–236
 - culture media preparation, 41–42, 42f
 - cultures, 12–17, 14f, 15f
 - mycobacteria handling, 254
 - nosocomial infection prevention, 147
 - pure cultures, 46
 - specimen collection and transport, 94
 - standard precautions and, 95, 306, 307t, 308t
 - subcultures, 51
 - urine specimens, 211–212, 213–214, 213f

- Aspergillus* spp., 277, 283–284, *colorplates* 46–47, 49
- athlete's foot infections, 276
- auramine dye, 254
- autoclaves and autoclave guidelines, 63–67, 64f, 64t, 65f
- automated blood culture system, 236–237, 236f

- Bacille Calmette Guerin (BCG) vaccine, 255
- bacilli, 22, 22f
- Bacillus* spp., 38
- Bacillus stearothermophilus*, 65–66, 65f
- Bacillus subtilis*
 - disinfectants and, 74, 75
 - Gram stain results, 32
 - growth observations, 17–18
 - heat sterilization effects on, 58, 59–60, 67
 - penicillinase detection susceptibility testing, 89
 - simple stain preparation of, 24
 - starch hydrolysis, 105t, 106
- bacitracin tests, 155, *colorplate* 29
- BacTAlert instrument, 236–237, 236f
- bacteremia
 - case studies, 237–238
 - diagnosis of, 234–236
 - result interpretation, 237
 - testing and reporting, 236–237
 - types of, 233–234
- bacteria
 - antimicrobial agents for. *See* antimicrobial agents
 - carbohydrate fermentation, 103–104, 107–108
 - colonies. *See* colonies of bacteria
 - cultures. *See* culture media; cultures
 - disinfectants and. *See* disinfectants
 - enzymes, 111–116. *See also* enzymes
 - in flora. *See* flora
 - metabolic activities of, 103–108
 - morphology, 11, 12f, 17–18, 21–22, 22f, *colorplates* 1–8
 - motility, 22–23
 - resistance to antimicrobial agents. *See* resistance to antimicrobial agents
 - slide preparations. *See* slide preparations
 - staining techniques. *See* staining techniques
 - starch hydrolysis, 104–106, 105t
 - susceptibility testing, 56, 81–87. *See also* susceptibility testing
 - tryptophanase and, 106–107
- bacterial pneumonia. *See* pneumonia
- bactericidal and bacteriostatic disinfectants, 71. *See also* disinfectants
